

Personal Representative

The Federal Government has instituted new privacy regulations. According to these regulations, we can only disclose your protected health information to a friend or family member you appoint as your "personal representative". We will not be able to discuss your treatment, diagnosis, prescriptions, appointments or medical bills with anyone, unless they are designated as your "personal representative".

Please list the name(s) of anyone you designate as your personal representative. This will allow our office staff and physicians to discuss your protected health information with these individuals.

You will be required to inform us, in writing, if you choose to delete an individual from this list.
